FIRST INSTALLATION

## 1 Connecting the Base

Plug one end of the telephone line cord into the telephone jack on base bottom. (Fig. A)

Plug the small end of power adapter into a power jack on base bottom. (Fig. B)

Plug the large end of power adapter into a wall power outlet. (Fig. C)

Plug the other end of the telephone line cord in to the telephone jack or micro-filter.

Always use the cables provided in the box.

For multiple pack version, plug the power adaptor of the charger into a wall power outlet.
2 Installing the handsets and Charging the Batteries

1. Slide down to open the battery compartment cover.
2. Place the 2 supplied rechargeable batteries as indicated. Pay extra attention to direction of polarity.
3. Slide the battery compartment cover back.
4. Put the handset on the base or on the charger and charge for **15 hours** before using the handset for the first time. The handset will emit a beep when it is properly placed on the base or charger.

Always use the rechargeable batteries provided in the box.
Notes:

If you need to remove the batteries, slide open the battery compartment cover and using the finger hole, grip the batteries and gently pull them out.

3 Using your phone

- After first time power up (base unit is connected to AC mains), welcome mode message will appear on the screen.

1. Select your country as follows:

2. You can select a language different from the country in **Settings** menu:

Menu / ⁀ or ᴄᴀʟʟꜱ / **Settings** / **OK** / ⁀ or ᴄᴀʟʟꜱ / **Language** / **OK** / ⁀ or ᴄᴀʟʟꜱ /

Select your language among the below proposals and validate with / **OK**

English	Français	Deutsch	Italiano	Nederlands	Español	Português
LANGUAGE	LANGUE	SPRACHE	LINGUA	TAAL	IDIOMA	LÍNGUA

In case you selected a wrong language please find below the translation of **Settings** to reselect the language:

English	Français	Deutsch	Italiano	Nederlands	Español	Português
Settings	Réglages	Einstellungen	Impostazioni	Instellingen	Config. Telef.	Definições

? Troubleshooting

If you have difficulty with your phone, please try the suggestions listed below. As a general rule, if a problem occurs, remove the batteries from all the handsets in your installation for about 1 minute, then disconnect and reconnect the power supply to the base and reinstall the handset batteries.

Problem	Cause	Solutions
No dialing tone when pressing ⁀ key.	a. The connection cord of the base station is not plugged in. b. The adapter cord is not plugged in correctly in the base station. c. The line is busy, as another handset is used. d. Wrong connection cord.	a. Check the connections. Unplug and plug back in the mains. Check that the telephone line cord has been plugged into the base station and the phone socket. b. Check the base station plug and the AC plug (remove and plug-in). c. Wait until the line is unoccupied. d. Use the original connection cord.
"No Link to base" is displayed.	a. Base station out of range. b. Base station is not connected to mains.	a. Reduce the range. b. Connect base station to mains.
The call does not work.	Service not activated or wrong operator.	Check your Subscription with network.
No display.	Empty batteries.	Recharge batteries.

🔧 Technical Details

Field Range	Up to 300 meters*
Indoor Range	Up to 50 meters*
Handset Battery Autonomy (average values)	18 hours talk time** 300 hours standby**
Number of Handsets	Up to 4
Electrical Connection/ Base Mains Adaptor/ Charger	Base main adaptor & Charger adaptor: Model No.: 1-CHUKA451-082 or AT-536B-060045B Input: 100-240 V/50-60 Hz/0.15 A Output: 6V DC/450 mA, 2.7W Only use the adaptors supplied with telephone. Single-phase AC, excluding IT install defined by the EN62368-1 standard. Caution: The network voltage is classified as hazard by the criteria of this standard.
Telephone Connection	Appliance designed for connection to a TNV3 class (telecommunications network voltage) analogue telephone line as defined by the EN62368-1 standard.

SAFETY
This telephone is not designed for Emergency calls when the main power fails.
Do not use your telephone to notify a gas leak or other potential explosion hazard.
Do not open your device or its power supply to avoid risk of electrical shock.
Do not attempt to open the batteries, as they contain hazardous chemical substances.
Your telephone must be located in a dry place away from hot, humide and direct sunlight condition.
To avoid radio signal interference, place the phone at least 1 meter away from other electrical appliances or other phones.

ENVIRONMENT
This symbol means that your inoperative electronic appliance must be collected separately and not mixed with the household waste. The European Union has implemented a specific collection and recycling system for which producers are responsible.
Help us protect the environment in which we live!

CONFORMITY
Hereby, ATLINKS EUROPE declares that the radio equipment type DECT is in compliance with Legislation: UK Radio Equipment Regulations (SI 2017/1206).
The full text of the UKCA and EU declaration of conformity is available at the following internet address: www.alcatel-home.com

Follow below table to activate the desired mode

Call blocker status	Description
ON	**Premium call block** Authorized callers (phonebook and allowed list) call as usual and may leave a message on the answering machine if it is enabled. **Numbers in the black list are automatically rejected.** For the others, the phone plays a greeting message asking to enter a code to activate the ringer. Callers who don't get the code are rejected or authorised to leave a message (setting). Automated calls will be all directly rejected and blocked, as not able to enter a code. Anonymous, international or unknown numbers can also be set to always be blocked.
CONTACTS OK	Contacts saved in phonebook and allowed list call as usual and may leave a message on the answering machine if it is enabled. All others are automatically rejected. Anonymous, international or unknown numbers can be set to always be blocked .
VIP OK	Only Contacts saved as VIP and allowed list call as usual and may leave a message on the answering machine if it is enabled. All others are automatically rejected. Anonymous, international or unknown numbers can be set to always be blocked .
NIGHT	Same as VIP OK from 09:00 pm to 09:00 am. Out of this time frame the automatic Call block is OFF and calls can be blocked manually.
OFF	Automatic modes are disabled. **Manual Call block remains with its dedicated key.** Numbers can be rejected and added to Black List one by one during ringings, calls or TAM answers.

---

1. Enable ON: Premium Call Block
In idle mode, press 🚫 , then choose **Call Blocker** and press **Select**, then choose **Status** and press **Select**, then choose **ON** and press **Select**.
After you enable this option, **Call Block On** will be displayed on the idle screen.

1.1. Greeting message: Default/Personalize
Default greeting message recorded in your phone doesn't indicate the PIN access code to dial in order to bypass the call block and have the phone ring. If you prefer disclosing this code, you can record your own greeting message giving the PIN assess code.

1.1.1. How to record your own greeting message
In idle mode, press 🚫 , then choose **Call Blocker** and press **Select**, then choose **Greeting** and press **Select**, then choose **Record message** and press **Select**. Then follow the voice guide.

1.1.2. Default access code
The default access PIN code is 00. You can change it as follows:
In idle mode, press 🚫 , then choose **Call Blocker** and press **Select**, then choose **Change PIN** and press **Select**. Then follow the instructions on the screen.

1.2. Set if you want those who are rejected to leave a message on your answering machine
In idle mode, press 🚫 , then choose **Call Blocker** and press **Select**, then choose **Save Msg to DTAM** and press **Select**, then choose **On** and press **Save**.
Note: the answering machine must be turned On. Please refer to the Base description drawing.

1.3. Add a Number to Allowed list
1.3.1. In idle mode
Press 🚫 , then choose **Allow List** and press **Select**, then choose **Add contact** and press **Select**, then enter the phone number and press **Save**.

1.3.2. From Call list
In idle mode, press [CALLS] , then choose call list entry and press **Options**, then choose **Allow number** and press **Select**, confirm by pressing **Yes**.

1.4. Add a Number to Phonebook
Please follow the instruction of Phonebook section to store an entry in the phonebook.

1.5. Add a Number to Black list
1.5.1. In idle mode
Press 🚫 , then choose **Black List** and press **Select**, then choose **Add contact** and press **Select**, then enter the phone number and press **Save**.

1.5.2. From Call list
In idle mode, press [CALLS] , then choose call list entry and press **Options**, then choose **Block number** and press **Select**, confirm by pressing **Yes**.

1.5.3. When ringing
Numbers can be rejected one by one during ringing, on the call or when leaving a message by pressing 🚫 , then press **Yes** to save the number to Black List.

1.5.4. Delete a number from Black list
In idle mode, press 🚫 , then choose **Black List** and press **Select**, then choose **Delete** and press **Select**, choose the number and press **Select**, confirm by pressing **Yes**.

1.6. Add an Area code
In idle mode, press 🚫 , then choose **Blk Area code** and press **Select**, then press **Yes** and enter the area number to be blocked and press **Save**.

2. Enable CONTACTS OK
In idle mode, press 🚫 , then choose **Call Blocker** and press **Select**, then choose **Status** and press **Select**, then choose **Contacts OK** and press **Select**.

3. Enable VIP OK
In idle mode, press 🚫 , then choose **Call Blocker** and press **Select**, then choose **Status** and press **Select**, then choose **VIP OK** and press **Select**.

4. Enable NIGHT
In idle mode, press 🚫 , then choose **Call Blocker** and press **Select**, then choose **Status** and press **Select**, then choose **NIGHT** and press **Select**.

5. Enable OFF
In idle mode, press 🚫 , then choose **Call Blocker** and press **Select**, then choose **Status** and press **Select**, then choose **OFF** and press **Select**.

6. Block anonymous/international/out of area whatever the **Call Block** status, **except OFF**

When this **Withheld** is set to **ON**, the phone will block all calls that have no Caller ID.
When this **International** is set to **ON**, the phone will block all the international calls.
When this **Out of Area** is set to **ON**, the phone will block all the Out of Area calls.
In idle mode, press 🚫 , press [CALLS] to choose **Call type**, press **Select**.
Press ● on the navigation key to select **Withheld On/Off**, then press [CALLS] ,
Press ● on the navigation key to select **International On/Off**, then press [CALLS] ,
Press ● on the navigation key to select **Out Of Area On/Off**, then press **Save**.
