- Date and time display
- Easy-to-use menu

- **Phonebook with 200 contacts** and 3 numbers per contact
- List of the last 30 numbers dialled
- List of the last 50 calls received*

- **High-quality hands-free function** with volume control
- Adjustable earphone volume (5 levels)
- 10 ringtones for the handset: 5 classic + 5 polyphonic
- VIP* function to identify important callers with a specific ringtone
- Adjusting the handset ringer volume
  (5 levels + deactivated)
- Different ring tones: external / internal calls

Customisable call block*
Ability to block up to 1000 numbers!

Automatic blocking so you're never disturbed and never miss an important call:
- Contacts stored in the phonebook can make unlimited calls, as usual.
- For other callers, an access code is requested before the phone rings. Callers who do not know the code are either rejected or allowed to leave a message on the answering machine (depending on the setting).
- Automatic and advertising calls are blocked immediately.
- Anonymous, international or unknown numbers can be permanently blocked.
- Night mode (time slots), VIP mode and Contacts mode for more personalised call reception.

Manual blocking on a case-by-case basis:
A dedicated button can be used to block any unwanted number, whether during the ringing tone, during the call or even while a message is being recorded on the answering machine.

Integrated answering machine

- **50 minutes** of recording time
- **Message counter** on the base
- **Selective playback of messages** to choose which to listen to first
- Easy to use thanks to the control buttons on the base
- **Call filtering**
- Remote control
- Simple answering mode or recording answering mode
- Pre-recorded or customisable message for callers
- Memo function

Multiple handsets

- Up to **4 handsets** can be linked **to a base station**
- **Customisable handset** (name, ringtone, screen colour)
- **Automatic directory copy** on each handset
- Calls between handsets / call transfer
- Three-way conference call (2 internal callers + 1 external caller)

ECO-DESIGN

- The system detects when the battery's charge level is sufficient and stops charging to reduce energy consumption.
- **Eco-Mode** reduces power consumption when the handset is placed on the base station.
